

REDUCE. REUSE. RECYCLE.

RECYCLING WEEK 2021

20th-26th September 2021

Sarah Clayton, head of citizen behaviour change at Waste and Recycling Action Programme, said: "We know that climate change is an issue people are passionate about. Often we can feel powerless to act, but recycling is one activity that we can all do to help the planet."

"As a nation our commitment to recycling has continued to grow, even during the challenges of the last year. We want Recycle Week 2021 to inspire more people to Step It Up and fight climate change".

We are launching our campaign to achieve Eco-School status by the end of this academic year. What better time than Recycling Week 2021 to pledge HGPS commitment to making a difference to a local and global cause?

Pupil benefits include:

- Engages young people in important environmental issues.
- Demonstrates to pupils that environmental actions can be enjoyable, social and rewarding.
- Teaches responsibility and generates a sense of community.
- Develops the skills and knowledge young people need to play an active role in protecting our environment now and throughout their lifetimes.
- Empowers students with the belief that they can have a positive impact on our planet.
- Enables schools to green their entire curriculum.

The Eco-Schools programme empowers young people to introduce and lead environmental actions and education in their school. We plan to set up an Eco Committee made up of children from each phase. This will launch later in the Autumn term.
